\*Our Essential Utility Set Series is geared towards high volume demand hospitals who need to frequently replenish utility instruments that are being used every day. Aside from offering a steady supply of new instrument sets we are also happy to accept your used sets for repair or refurbishment by our German-trained expert associates in Penang, Malaysia.

Please contact us for details, variations or modifications to our sets and visit our online catalogues for more choices

### THE HYGEIA LEASE 2 OWN SYSTEM

Under our HyL2O system you pay only 40% of the total price of a brand new set of instruments, and after three months you pay only 20% when we replace the entire set with another one.

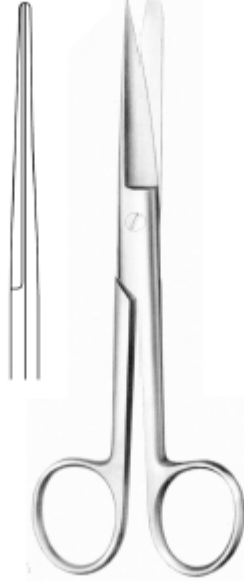

We then continue to do the same every three months thereafter, and each time you only pay 20% of the total price of new set of the same instruments.

This way you have the use of 4 complete sets during the first year, for the price of one.

**DF-22-280**  
Dressing Scissors
